# Aritra Debnath

---

I'm a passionate Front-End Developer with over 4 years of experience rocking React.js, JavaScript, HTML, and CSS. I love building user-centric web applications and believe a strong understanding of front-end principles is key. While my focus is front-end, I also have a year of experience working with Node.js on the backend, giving me a well-rounded skillset. I'm a team player and eager to collaborate on building awesome things!

---

Jan 2023 – July 2023

## Frontend Developer Shamaim Lifestyle

Writing and making an Ecommerce website focused in Fashion. Helped to launch the start up by making the website up and running. Also worked on backend product CRUD operation and made authentication API in node.js.
